## DETAILED ACTION

Applicant's Amendment filed 11/28/2005 has been fully considered and entered.

### ***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance:

Independent Claims 1, 7 & 10 are allowable over the Prior Art of Record, since the cited references taken alone or in combination do not teach or suggest: *"a signal processing circuit for converting user data into a recording data sequence on a sector block by sector block basis; and a current driver for converting the recording data sequence into a recording current that is applied to the recording head, wherein the signal processing circuit adds at the end of the recording data sequence for each sector block a repetition pattern of a minimum bit length for the particular block, and the repetition pattern comprises four or more bits of repetitions of magnetization inversion at the intervals of a minimum-bit length of a relevant sector"*

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Nishida et al. (US 6,667,813); Kuroda (US 6,522,610); Kuroda et al. (US 6,775,099); Oka et al.
